

oil and gas radar quarterly

Every three months, coinciding with the ASX quarterly reporting periods, the Oil & Gas Radar changes from its usual weekly format to a three month forecast of planned drilling and seismic activity. This offers subscribers the industry's best snapshot, as accurately as we can report, of what wells & seismic activity are coming up throughout Australasia for the following quarter based on information from our comprehensive contacts list. Oil & Gas Radar Report in its usual, weekly format will return in the next edition.
